

JavaScript Assignment 10

JavaScript Assignment 10

Question 1: Write a simple JavaScript Program that contains two buttons “set cookie” and “get cookie”. If cookie is not set then the “get cookie” should show appropriate message. Set a cookie named “name=your name” using “set cookie” button and display it in a alert using “get cookie” button.

Question 2: Write a Javascript Program to create one cookie that contains your firstname, lastname and age. As described in question 1, use “set cookie” and “get cookie” buttons to set and retrieve them.

Question 3: Write a JavaScript Program to delete the cookie created using question 1 by any cookie deletion method.
